

Requirement :

RaterTracker is a .net application.

It require .Net framework 4.7.2.

Be sure you have it installed or download it at :

<https://dotnet.microsoft.com/download/thank-you/net472>

Install :

After extract archive you need to configure it : put your leapforce gmail adress, your pay rate and reload time.

When run first time you need to install ssl certificate.

- **Go to settings tab**
- **Click on advanced**
- **Click on install ssl**
- **And wait little a popup will ask you for grant certificate**

As this tools use internet connection you need to approve it in your firwall if you have one.
